Joseph Chauvin

Software Engineer with 3 years of experience.

joseph.chauvin102@gmail.com | (832)205-6360 | Asheville, NC | LinkedIn: /josephchauvin/

SKILLS

Languages & Frameworks: JavaScript ES6+, React.js 19, Next.js 14, HTML5, CSS3, SvelteKit, Svelte 5
Libraries & Tools: Vercel, Chart.js, Lit.js, SVG, Webpack, Vite, Git, VS Code, npm
Design & UI: Design Systems, Flexbox, Grid, SCSS, Responsive Design, Web Standards, Accessibility
Other Skills: Agile, Scrum, Communication, Code Architecture, SSR

PROJECTS

Yuma Internal Dashboard (JavaScript ES6+, SvelteKit, Svelte 5, SCSS, Chart.js, Vercel)
Cryptocurrency portfolio webpage
- Designed and built a cryptocurrency dashboard utilized daily by company leadership to monitor performance metrics, providing a reliable tool for tracking key financial and operational data.
- **Led Front-End development efforts,** ensuring a robust and scalable architecture, seamless deployment with open-source API integration, and styling that fully adhered to brand guidelines.
- Implemented an automatic refresh feature to deliver real-time data updates.

Design System (JavaScript ES6+, SvelteKit, Svelte 5, SCSS*)*
System for building consistent web experiences
- **Spearheaded a design system,** successfully adopted across multiple projects with varying technologies, enabling seamless consistency and adaptability throughout diverse technical environments.
- Worked with designers and managers to align the design system with team needs.
- Supported engineering teams in integrating the design system.
- Created a documentation site to help with developer integration.

WORK EXPERIENCE

Yuma (Front End Software Engineer)   2025
Forefront of decentralized intelligence
- Quickly developed a robust dashboard for the dTAO launch, delivering accurate Bittensor chain data to support leadership with essential insights during a critical rollout.
- Successfully engaged with leadership to gather valuable insights on app usage and priorities, leveraging their feedback to enhance functionality and align with strategic goals.

Foundry Digital (Front End Software Engineer)   2022 – 2024
Top Bitcoin mining pool in the United States
- Redesigned and launched a site map feature, enabling users to visualize mining operations with greater clarity and effectiveness.
- Integrated design system in multiple codebases, enforcing consistent standards across projects.
- Demoed a prototype to leadership, collecting actionable insights that guided refinements to improve the design..
